IRISES from "Top of the World" BOULDER, COLORADO

ONE of my specialties is the Iris. Out here "Where the West Begins" the mile-high altitude, the dry air, the abundant sunshine—all combine to produce clean, healthy stock.

Winters are cold enough to eliminate varieties that will not do well in every section, yet not severe enough to cause loss or weakening of plants from heaving of the roots.

You should see the fine reports I receive from those who have planted my Irises in all parts of the United States, Canada and even Australia and New Zealand.

You, too, will be delighted with "Iris from Top of the World." Take a Long Chance and order at least a few Long Iris for observation.

All Iris roots prepaid in U. S. A. and Canada. Other countries add 5c each for extra postage and special packing. Cash with order. Delivery after July 4th.

San Francisco Iris

Los Angeles Iris

"TALE OF TWO CITIES"

I don't know how much truth there is in it. But they do say there is keen rivalry between two wonderful California cities, Los Angeles and San Francisco.

I like 'em both immensely. But since I have a lot of friends in both places you don't catch me taking sides in the rivalry or controversy, if any.

"TALE OF TWO IRISES"

Two of the largest, finest and most popular Irises are named San Francisco and Los Angeles. (There! See how careful I am not to favor one more than the other. I mention Los Angeles first in one paragraph, then San Francisco first in the next!)

Similar but Different. Both these Irises are immense whites. In San Francisco the standards and falls are distinctly edged with lavender. In Los Angeles, the lavender or light blue marking is heavier near the base of the petals. The illustrations on this page are from specimens in my own garden, May, 1936. To save space I show only the middle and upper portion of the blooms, to give you an idea of the color placement. This coloring shows up a bit stronger on San Francisco than on Los Angeles.

There appears to be considerable rivalry between these two Irises. Some Iris fans say San Francisco is the better, others find Los Angeles more to their liking. As for myself, on Mondays, Wednesdays and Fridays I think one of them should have the blue ribbon. But on Tuesdays, Thursdays and Saturdays, I think maybe, after all, the other one is the winner.

Of course I might get the Literary Digest to conduct a nation-wide poll and settle this once for all. But I have another plan.

I'm going to make you a very special offer on these two super Irises, and ask you to drop me a post card after they have bloomed in your own gardens. Tell me if you can, which one is the better.

Here's My Offer: For 60c I'll send you one strong division of Los Angeles and one of San Francisco, prepaid.

For \$1.00 I'll send you two strong divisions of San Francisco and two of Los Angeles, prepaid.

Happy Days (Mitchell, 1934). Introducing description: A real triumph in yellow breeding which bids fair, in time, to become the most popular iris in the United States. An immense clear yellow most easily described as a yellow El Capitan, although in established plantings the bloom will be slightly larger than those of the latter. Perfectly branched, with each stalk carrying seven or eight massive blooms. Color, clear pinard yellow, with the falls being a shade deeper than the standards, and the beard an attractive orange yellow. Unusual glistening finish. No tendency towards flecking and fading. Blooms measure 7 1/4" from top to bottom, and 3 1/4" across the falls. Height 40". Flowers through the season. We venture to predict that Happy Days will remain sensationally outstanding as long as has the remarkable Frieda Mohr. Each.....	12.50	Marquita Luminous ivory yellow with falls heavily lined maroon. HOW TO GROW IRIS

Open Season for Iris. Iris may be reset any time when the ground isn't frozen. Best time is from midsummer to last of September so the roots become well established before winter. **July and August plantings make strongest roots for blooming next season.**

The Iris increases by new shoots forming from eyes or buds at the sides of the division or "toe" planted. In most sections the new shoots make new divisions strong enough to be detached and reset by early July. But a few weeks additional growth before replanting is advisable. If you have Iris shipped in July or early August, do not expect as large roots as would be sent later in the season.

Set roots 12 to 20 inches apart, according to room. The closer they are set, the sooner they will need to be taken up, divided and reset. Even 12 inches should bloom three years.

Cover the roots only an inch or so. They like to be near the surface. Tramp on the fleshy part of the root (the rhizome) and tramp hard, after it is planted. Keep watered for a few weeks until new growth starts. Don't worry if the small threadlike roots are dried up when planting. New roots will start at once from the rhizome. If no rains, see ground doesn't dry out too much.

Iris can't stand wet feet. Always see that no water stands on them. If soil is not sandy, then better raise the beds or rows before planting, so good drainage is insured.

From Oshkosh, B'gosh! "The Iris I received from you are now all in bloom or bud. Never have I seen anything so beautiful as Pres. Pilkington. It would be hard to say what is really best. I like Selene, Sensation, Black Wings, Mt. Royal, Eliz. Egelberg, Pluie d' Or and many others."—C. G. Young, Oshkosh, Wis.

NEW ICELAND POPPIES

(Nudicaule. Hardy Perennial)

(Sow the seed in summer or early fall for fine display next season)

They are of graceful neat habit with bright green fern-like foliage, formed in tufts from which issue slender stalks about 15 inches high, bearing their brilliant flowers in endless profusion. Most useful for cutting, for which purpose pick when in bud. If the seed pods are picked off, they continue in flower the entire season. They remain evergreen throughout the winter, coming into bloom early the following spring.

Iceland Poppies are valuable in a hardy border or in a permanent rock garden.

NEW ZEALAND MAMMOTH STRAIN. Mr. W. R. Toon, who developed this strain in New Zealand, says it is superior to the best he has tried from our country. A special mixture of pink, rose and pastel shades. Fine for cutting. Supply of seed limited. Pkt. 25c.

SANDFORD'S GIANT STRAIN. (New.) A new, giant strain with flowers of wonderful substance carried on strong stems 2 to 3 feet long. Many of the blooms measure 5 inches in diameter. The range of colors is particularly fine, including many lovely delicate shades and combinations of tints. Pkt. 20c; 1/2 oz. \$1.00.

SUNBEAMS. (Mixed.) This is the result of a cross between the Shirley and Nudicaule types. The flowers are charming shades of orange, salmon, maize and other tints, an improvement over the original Iceland strain. Pkt. 15c; 1/2 oz. 50c.

CHOICE MIXED. A better than ordinary mixture, made up by myself from choice strains and colors. Pkt. 10c; 1/2 oz. 30c.

Hardy Biennial Canterbury Bells

(Sow the seed in summer for fine display next season)

I think the "Cup and Saucer" type of hardy Canterbury Bells is the most pleasing. You get some in this without "Saucers," but they are also nice. Doubles out of place in a flower of this sort.

So here are the most popular colors in the hardy "Cup and Saucer" type:

DARK BLUE **ROSE**
LIGHT BLUE **WHITE**

Prices: Any of these 4 colors, Canterbury Bells, or all mixed, at, Pkt. 10c; 1/4 oz. 30c.
